

I listen to K-LOVE radio and KGBI-FM which are heard on FM translators. I understand that there's a possibility that low power FM (LPFM) may be given priority over FM translator services. These FM stations I listen to serve local communities with area activity announcements. They support wholesome values and have a positive and encouraging impact on my community. I enjoy these stations' family-friendly programming. If these stations are replaced by an LPFM it may not have the same type of safe, family oriented programming I appreciate. I can turn these stations on with children around and never have to worry about questionable content. I know this isn't true on television and I am concerned that it may not be true with LPFM. Please preserve these FM translator services that I value. Thanks.
